

SUZLON TO BUILD TWO WIND PROJECTS IN GUJARAT

MICHAEL GONSALVES

Pune

WIND turbine maker Suzlon Energy, the fifth largest player globally, on Monday said it has won two wind power projects totaling 500 megawatts, which would earn it total revenues of about Rs 3,250 crore.

The Pune-headquartered renewable energy solution provider said it has won two wind power projects of 300 MW and 200 MW.

The company will install 238 units of S111 140m

wind turbine generators (WTGs) with rated capacity of 2.1 MW each, Suzlon said in a statement.

The projects will be located at Kutch district in Gujarat, it said.

When completed the projects will provide electricity to over 3 million households and curb more than 10 million tonnes of CO2 emissions per year.

Suzlon will execute both the projects on a turnkey basis and will also provide operation and maintenance services.
